MYDREAM / CONCEALED MULTIFUNCTIONAL SHOWER HEAD

Relaxation, magic and amazement all in one solution

With our multifunctional shower heads, the bathroom becomes a place of pleasure and relaxation, a place where you can nourish your psychophysical well-being and rediscover your intimacy.

The collection propose different styles to satisfy every need and complete all types of environment.

Among its functions, it is possible to select the water effect between rain, single waterfall, double waterfall, mist, tropical waterfall and Kneipp for a feeling of complete relaxation.

Equipped with LED spotlights for chromotherapy, you can choose the colour gradation of the spotlight or let yourself be enveloped by the coloured path for a true immersion in physical and mental well-being.

A rainbow of exciting colours and water in its various forms combine their benefits to create a pleasant multi-sensory experience.

Colours, water and lights can be selected manually during the shower, or set for an automatic cycle.

Several showerheads in series (single- and/ or multi-jet) controlled by a start button or with touch control and electronic faucet.

Sensorial showers are an indispensable addition to the wellness area and home spa today. Wellness pathways create magical settings by combining light effects, water effects and fragrances. The most sophisticated technologies converge in the shower paths for a unique and unforgettable wellness experience. Depending on the level of interaction accorded to the user , there are two levels of design of the wellness path.

Level 1: Wellness path that consists of starting the path through an on/off push-button panel and the use of an electronic control unit that automatizes the activation in sequence of the different water jets with preset temperature, duration, chromotherapy and aromatherapy.

Level 2: Wellness path using a touch control with an electronic faucet, offering maximum interaction to the user who can independently manage water jets, temperature, duration, up to the setting of chromotherapy and aromatherapy.
